GO_BP: positive regulation of monoatomic ion transmembrane transport
KEGG: IL-17 signaling pathway
GO_BP: cell killing
GO_BP: killing of cells of another organism
GO_BP: disruption of anatomical structure in another organism
Hallmark: Il6 Jak Stat3 Signaling
KEGG: NF-kappa B signaling pathway
Reactome: Cytokine Signaling in Immune system
Reactome: Immune System
KEGG: Pathways of neurodegeneration - multiple diseases
GO_MF: transmembrane signaling receptor activity
KEGG: Pathways in cancer
Reactome: Developmental Biology
Reactome: Interleukin-2 family signaling
Reactome: Collagen degradation
KEGG: Transcriptional misregulation in cancer
KEGG: Prostate cancer
KEGG: Coronavirus disease - COVID-19
KEGG: Hematopoietic cell lineage
Reactome: TNFs bind their physiological receptors
KEGG: Proteoglycans in cancer
Reactome: TNFR2 non-canonical NF-kB pathway
KEGG: Alcoholic liver disease
Reactome: Chemokine receptors bind chemokines
KEGG: C-type lectin receptor signaling pathway
Reactome: Class A/1 (Rhodopsin-like receptors)
Reactome: Peptide ligand-binding receptors
